

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the present application:

Listing of Claims:

Claim 1-10 (cancelled)

Claim 11 (original) A process for a camera having a display, the process comprising the steps of:

displaying a cursor and a first portion of a scene on the display;
using the cursor to select a first location within the first portion;
moving the camera to display a second portion of a scene on the display;
sensing motion of the camera;
displaying the cursor based on the motion; and

using the cursor to select a second location within the second portion such that the first and second locations define a region of the scene, the region being of greater extent than is displayed in the display.

Claim 12 (original) The process as set forth in claim 11, wherein an operation is performed on the region.

Claim 13 (original) The process as set forth in claim 12, wherein the operation includes the step of capturing a panoramic image having the extent of the region.

Claim 14 (original) The process as set forth in claim 13, wherein the step of capturing the panoramic image includes displaying an indicator on the display to guide movement of the camera.

Claim 15 (original) The process as set forth in claim 12, wherein the operation includes the step of zooming the camera to display the region in the display.

Claim 16 (original) A process for a camera having a display, the process comprising the steps of:

displaying a first portion of an image on the display;

displaying a first portion of an image on the display;

moving the camera;

sensing motion of the camera; and

based on the motion, displaying a second portion of the image on the display.

Claim 17 (original) The process as set forth in claim 16, wherein the image is a panoramic image.

Claim 18 (original) The process as set forth in claim 16, wherein the image has a resolution greater than the display,

Claim 19 (original) A camera having a display, the camera comprising:

a motion sensor to sense motion of the camera;

circuitry to display a cursor and a plurality of icons on the display, based on the motion, the circuitry repositioning the icons in the display until the cursor is on a target icon of the plurality of icons; and

a selector to select the target icon.

Claim 20 (original) A camera having a display, the camera comprising:

a motion sensor to sense motion of the camera;

a selector; and

circuitry to displaying a cursor and a first portion of a scene on the display, if the cursor and selector is used to select a first location within the first portion, and the camera is moved to display a second portion of a scene on the display, the circuitry displays the cursor based on the motion so that the cursor can be used to select a second location within the second portion such that the first and second locations define a region of the scene, the region being of greater extent than is displayed in the display.

Claim 21 (original) A camera having a display, the camera comprising:

a motion sensor to sense motion of the camera; and

circuitry to displaying a first portion of an image on the display, and if motion of the camera is sensed, based on the motion, the circuitry displaying a second portion of the image on the display.
